## PREFACE

This is one of a series of volumes presenting final results of the 1958 Census of Business. Statistics for Retail Trade are contained in two volumes—Volume I and this volume. The 1958 Census of Business, covering Retail Trade, Wholesale Trade, Selected Service Trades, and Public Warehousing, was authorized by law under Title 13 U.S.C. Previous Business Censuses covered the years 1929, 1933, 1935, 1939, 1948, and 1954.

The cooperation of the Bureau of Old-Age and Survivors Insurance of the Department of Health, Education and Welfare and the Internal Revenue Service of the Treasury Department in permitting use of certain of their records was important to the conduct of the 1958 Census of Business. This cooperation made it possible to conduct the Census at a materially lower cost than would otherwise be the case and also made it unnecessary for a large number of business establishments to prepare special Census reports.

The Bureau of the Census also acknowledges the advice and counsel made available through the Census Advisory Committees of the following organizations during the planning phase of the Census: the American Marketing Association; the American Retail Federation; the American Statistical Association; the Newspaper Advisory Committee, composed of representatives from the major associations in the newspaper industry; and similar assistance from many other private and public organizations. The Bureau also wishes to acknowledge the excellent cooperation of business firms in completing the required Census forms.

Timely publicity given to the Business Census by chambers of commerce, business organizations, trade papers, local newspapers, and television and radio stations aided greatly in informing businessmen of the nature and objectives of the census and facilitated the collection of Census reports.

Primary responsibility for the 1958 Census of Business program was centered in the Business Division of the Bureau of the Census, under the direction of Harvey Kailin, Chief, and Louis Greenberg, Assistant Chief, Programs. The Census program was under the direct supervision of Henry Wulff, Chief of the Census Program Branch. Robert C. Viehman was Chief, and Gerald Post, Assistant Chief of the Retail Trade Section. They were assisted by Philip M. Chenoweth, Mary E. Lawrence, C. Daniel Bremer, John C. Brown, Jr., Mabel N. Foster, and Grace H. Sawyer. Staff assistance was provided by Ralph S. Woodruff, Assistant Division Chief, Research and Methodology, Frank A. Cirillo, Chief, County Business Patterns and Special Surveys Branch, and Max Shor, Chief, Program Research Branch.

Processing of the 1958 Census of Business reports was performed in the Economic Operations Division under the direction of M. D. Bingham, Chief. The processing was under the direct supervision of Irving Weiss, Assistant Chief, Processing, assisted by Max E. Van Horn, Charles Merzel, Donald E. Young, Wesley R. Grier, Bernard M. Kinney, and Ruth H. Mills. Systems and procedures were developed and supervised by Sol Dolleck, Assistant Chief, Systems, assisted by Samuel Schweid, Nathan Lesowitz, and Jack Margolis. Jack Scharff developed and supervised the electronic computer programming work, assisted by John S. Lannan. Quality control plans and procedures were developed and supervised by Herman H. Fasteau, assisted by George Minton, and Alfred J. McKeon. Scheduling, progress reporting, and related staff work were supervised by Wilbur J. Mathias and Margaret R. Rommel.

The Electronic Systems Division under Robert F. Drury, Chief, provided electronic computation services. Rudolph M. Micolý and James W. Shores supervised the scheduling and operation of equipment; Edgar D. Morgan and William M. Gaines supervised equipment engineering and maintenance; and Mrs. Dorothy P. Armstrong supervised general-purpose computer programming activities.

Other divisions and offices of the Bureau which contributed to the various phases of the census were: (1) the Machine Tabulation Division, C. F. Van Aken, Chief; Joseph S. Pewterbaugh and Emil Gorgovits developed techniques and procedures; and Frank McGrath, assisted by Emma Gass, supervised the card punching; (2) the Geography Division, William T. Fay, Chief; Robert Klove and Robert Hagan, Assistant Chiefs, assisted by Toshi Toki, supervised the preparation of the maps and charts and participated in the devising of procedures for geographic allocation of reports; (3) the Administrative Service Division, Everett H. Burke, Chief; Robert H. Brooks, Chief, Graphics Branch, was responsible for preparing Census of Business publications for reproduction; (4) the Statistical Reports Division, Edwin D. Goldfield, Chief, and William Lerner, Assistant Chief; Sheldon Klein, Chief, Presentation Practices Branch, and Julia Moring reviewed all table forms and text material and assisted on publication problems; (5) the Office of the Chief Economic Statistician, Julius Shiskin; Harold T. Goldstein was responsible for the preparation of kind-of-business coding manuals; (6) the Bureau of the Census Operations Office at Jeffersonville, Ind., Robert D. Krook, Executive Officer, where many of the Census processing operations were conducted; (7) the Personnel Division, James P. Taff, Chief; and (8) the Budget and Management Division, Charles H. Alexander, Chief.

# INTRODUCTION

## AUTHORITY AND SCOPE

The 1958 Census of Business along with the 1958 Censuses of Manufactures and Mineral Industries was required by law under 13 U.S.C., sections 131 and 224. These censuses covered businesses operated in the continental United States, Alaska, Hawaii, Guam, and the Virgin Islands. A separate Census of Business and Manufactures for 1958 was also conducted in Puerto Rico jointly with the Commonwealth Government.

The 1958 Census of Business covered Retail Trade, Wholesale Trade, Selected Service Trades, and Public Warehousing. This report provides findings for that portion of the 1958 Census of Business which relates to Retail Trade. The figures in this report were issued previously in Retail Trade area reports, Series BC58-RA.

## COMPARISON OF THE 1954 AND 1958 CENSUSES

In all major respects, the 1954 and 1958 Censuses were conducted under similar conditions and procedures. Strict comparability in the data for the two censuses is limited by the following factors:

1. The physical area of a number of urban places in the 1958 Census is not the same as it was in 1954 because of annexations and other boundary changes which have occurred since the 1954 Census. This factor should be taken into consideration in evaluating changes in census findings from 1954, as in each census the statistics for urban places are in accordance with the boundaries for those places in the census year.

2. Whereas in the 1954 Census, "leased departments" (businesses operated as departments of a retail business, under different ownership) were counted as separate establishments and separately classified by kind of business, in the 1958 Census they have been combined with the retail business in which located. As a result, it is anticipated that the count of establishments will be approximately 25,000 less in the

1958 Census than would have been the case if the 1954 Census procedure had been followed. In addition, there will be some redistribution in the data among the various kinds of business categories (e.g., the figures for a leased shoe department located in a department store which were tabulated in the "shoe store" kind of business in 1954, are included with "department store" figures in the 1958 Census). Leased departments in the 1954 Census reported sales of approximately one billion dollars.

3. Revisions made in the 1957 edition of the *SIC Manual* have necessitated the following changes in establishment classifications used in the 1954 Census:

a. Musical instrument stores and music and record shops have been shifted to the kind-of-business group "Furniture, Home Furnishings, Equipment Stores" from the group "Other Retail Stores."

b. Antique stores have been shifted to the group "Other Retail Stores" from the group "Furniture, Home Furnishings, Equipment Stores."

4. Both the 1954 and 1958 Censuses excluded those businesses with no paid employment which had sales volume of less than \$2,500 in the census year. To the extent that price increases since 1954 resulted in increases in the dollar volume of sales, the 1958 Census includes stores with a lesser physical volume of business than were included in the 1954 Census. While the exact magnitude of this phenomenon is unknown, the effect on total volume of retail sales undoubtedly is only a fraction of one percent and probably has little effect on the number of stores included in the census.

## CENSUS DISCLOSURE RULES

In accordance with census law, any data which would disclose the operations of an individual establishment or business organization are not published. The number of establishments in a kind of business is not considered a disclosure by these rules, so that this item is shown in instances where other items of information for the same kind of business or locality are suppressed.

The area chapters of this volume comprise the statistical portions of previously published area reports (series BC58-RA). Corrections found after publication of the area reports have been carried to the cities and counties affected. Corrections have not been carried to the Standard Metropolitan Statistical Area, State, etc., unless they significantly affect the data for such areas.

# PROCEDURES AND DEFINITIONS

## KINDS OF BUSINESS COVERED

This report covers all establishments included in retail trade in accordance with the principles of the 1957 edition of the *Standard Industrial Classification (SIC) Manual* issued by the Bureau of the Budget, Executive Office of the President. Also included are retail liquor stores operated by State and local governments. This report does not include data for administrative offices, warehouses, and other units which service and are auxiliary to retail establishments of the same organizations. Data for these units will be included in later reports. (See KIND-OF-BUSINESS CLASSIFICATIONS for definitions of the kind-of-business categories for which data are shown in this report.)

## METHOD OF ENUMERATION

For purposes of coverage in the 1958 Census of Business, retail establishments were divided into two categories--those with some paid employment during 1958, i.e., the "employer" universe, and those with no paid employment during 1958, i.e., the "nonemployer" universe. The method of obtaining census information for these two groups is described below:

**Enumeration of "Employers."**—Information for establishments in this part of the retail trade field was obtained by means of a mail canvass. Report forms were mailed to all business firms included in the active records of the Internal Revenue Service as subject to payment of Federal Insurance Contributions Act (FICA) taxes (i.e., employers of one or more persons) and which were classified in the records of the Bureau of Old-Age and Survivors Insurance (BOASI) as wholly or partially engaged in retail, wholesale, manufacturing, and mineral industries. Also included were those classified in major groups 70 (except 702 and 704), 72, 73, 75, 76, 78, and 79 of the service industries portion of the *SIC Manual*, and in public warehousing, SIC major group 42, except 421. In addition, report forms were mailed to all establishments which BOASI had not classified by kind of business prior to mailing of census report forms. Each establishment was mailed a report form appropriate to its BOASI classification (for those cases for which BOASI classification had not yet been established, a general purpose form was used), but its census classification was determined by replies to questions on the census report form.

**Enumeration of "Nonemployers."**—This group was defined to include retail businesses other than those represented in the active FICA records of the Internal Revenue Service. Information for this group of establishments was derived from the 1958 Federal income tax returns. Information was compiled from only one-half of these cases and census results for this group were established by multiplying such findings by two. The "nonemployer" segment of retail trade, although made up of a large number of establishments, accounted for less than 10 percent of the total retail trade volume.

Included in this segment were only those nonemployer establishments which reported a sales volume of \$2,500 or more during 1958. Nonemployer establishments reporting a sales volume of less than \$2,500 were not included in these tabulations, regardless of the period of time they were operated during the year.

**Enumeration of the Virgin Islands and Guam.**—In the Virgin Islands and Guam only, the 1958 Censuses were taken by means of a field canvass conducted in 1959. Enumerators canvassed all roads and streets obtaining reports for all places where a business was found to have been conducted in 1958. In addition, the Virgin Islands records of the Bureau of Old-Age and Survivors Insurance were used in accounting for all businesses with paid employees in 1958. Business licenses of the Virgin Islands also were used as a check on coverage. Despite these precautions, it is possible that enumerators missed a few places which were not recognizable as business establishments.

## EXPLANATION OF TERMS

**Establishments.**—Census of Business figures represent a summary of reports for individual "establishments" rather than "companies." A separate report was obtained for each location where business was conducted, including each location of multiunit organizations. Each report was tabulated in accordance with the physical location at which the business was conducted.

Where two or more activities were carried on at a single location under a single ownership, all activities generally were grouped together as a single establishment, and the entire establishment was classified on the basis of its major activity, with all data for it included in that classification. However, in cases where distinct and separate economic activities, for which different industry classification codes were appropriate, were conducted under the same ownership at a single location, and where conditions prescribed by the *SIC Manual* for recognizing the existence of more than one establishment were met, separate establishment reports for each of the different activities were reported in the censuses.

In the case of leased departments, i.e., where separately owned businesses are operated as departments of a retail business under another ownership (e.g., a separately owned shoe department in a department store) only a single establishment, combining leased departments with the retail establishment in which they are located, is recognized for 1958 Census purposes.

The "number of establishments" shown in this report is the number in business at the end of the census year.

**Sales.**—Sales include the total of merchandise sold, and receipts from repairs and from other services to customers, whether or not payment was received in 1958. Sales are normally recorded net of deductions for refunds and allowances for merchandise returned by customers. Total sales exclude amounts other than those received from customers, such as income from investments, rental of real estate, etc. They include the amount of local and State sales taxes and Federal excise taxes which are collected by the store directly from customers and paid directly by the store to a local, State, or Federal taxing agency. Gasoline, liquor, tobacco, and other excise taxes which are paid by the manufacturer or wholesaler and passed along to the retailer also are included.

The sales figures, therefore, represent total sales and receipts of all establishments primarily engaged in retail

trade. They do not include retail sales made by manufacturers, wholesalers, service establishments, and other businesses whose primary activity is other than retail trade. They do, however, include receipts other than from the sale of merchandise at retail (e.g., service receipts, sales to industrial users, sales to other retailers, etc.) by establishments primarily engaged in retail trade. Although the count of establishments as tabulated in this report represents the number in business at the end of the year, the sales figures include sales of all establishments in business at any time during the year.

**Payroll, entire year.**—Payroll includes salaries, wages, commissions, bonuses, vacation allowances, and the value of payments in kind (such as free meals, lodgings, etc.) paid during the year to all employees. Gratuities received by employees from patrons are not included. For corporations, it includes amounts paid to officers and executives; it does not include compensation of proprietors or of partners of unincorporated businesses. Payroll is reported before deductions for Social Security, income tax, insurance dues, etc.

**Payroll—workweek ended nearest November 15.**—This item consists of payroll, as defined above, which was paid to persons on the payroll in the pay period ended nearest November 15, 1958. Establishments whose payroll period was other than a week were requested to adjust the figures to a weekly basis.

**Paid employees—workweek ended nearest November 15.**—Paid employees consist of the number of employees, including salaried officers and executives of corporations, who were on the payroll for the workweek ended nearest November 15.

**"Full workweek" employees.**—"Full workweek" employees includes employees, whether regular or seasonal, who, for the specified pay period, were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment. All other employees paid during that workweek were reported as part-workweek employees.

**Proprietors of unincorporated businesses.**—Includes owners or partners of unincorporated businesses who devoted the major portion of their time to the operation of the business.

## KIND-OF-BUSINESS CLASSIFICATIONS

Retail trade, as defined in major groups 52 through 59 of the 1957 edition of the *SIC Manual*, and as covered in the 1958 Census, includes establishments primarily engaged in selling merchandise to personal, household, and farm users. In this report, liquor stores operated by State and local governments, classified in SIC major groups 92 and 93, also are included. Excluded from retail trade are places of business operated by institutions and open only to their own members or personnel, such as restaurants and bars operated by clubs, school cafeterias, eating places operated by industrial and commercial enterprises for their own employees, establishments operated by agencies of the Federal Government on military posts, hospitals, etc.

Establishments covered by the census were assigned a kind-of-business classification in accordance with the provisions of the 1957 edition of the *SIC Manual*. However, because in some instances a more detailed classification is required for Census purposes than is available in the *SIC Manual*, additional kinds of business have been identified within the SIC categories.

It should be noted that kind-of-business classifications are not interchangeable with commodity classifications. Most businesses sell a number of kinds of commodities. The kind-of-business code assigned generally reflects either the individual commodity or commodity group which is the

primary source of the establishment's receipts or some mixture of different commodities which characterize the establishment's business. Thus, the classification of establishments by kind of business generally does not make it possible to determine either the number of establishments handling a particular commodity or the sales of that commodity. For example, the "food group" classification excludes stores selling some food if the sale of food is not the primary source of receipts; moreover, even though stores are classified as "food stores" some of their receipts may be derived from the sale of nonfood products.

As noted in the section on "Method of Enumeration," the 1958 Census findings are based on reports from two different sources. "Employer" establishments were canvassed by mail and were required to complete report forms especially designed for this Census. "Nonemployer" establishments, however, were included in the Census on the basis of information supplied on the 1958 Federal income tax report. Because of the nature of the information available on the tax form, the kind-of-business classifications based on that form represent primarily "self-designation."

The classifications based on the Census forms, on the other hand, reflect the information on the commodity "composition" of the establishment as revealed by the Census classification inquiries. The effect of the two different sources on uniformity of classification, as reflected in the measurement of dollar volume of sales, is minor. In total, the "nonemployer" establishments account for less than 10 percent of retail sales and, in most cases, it is likely that the "self-designated" classification would be consistent with that derived from more comprehensive information.

The data in this report for three major SIC groups, 53, 55, and 59, have been subdivided, making it necessary to arrive at SIC major group totals by addition. (See description below for these major groups.)

The material which follows includes descriptions of those kinds of business for which separate information is provided.

### Lumber, Building Materials, Hardware, Farm Equipment Dealers (SIC Major Group 52)

Establishments primarily selling lumber, building materials, the basic lines of hardware, paint, wallpaper, glass, electrical supplies, roofing materials, and other supplies and equipment for home construction. Establishments primarily selling farm equipment are also included. Establishments in this group sell to contractors as well as to the general public.

**Lumber yards (SIC 5211).**—Establishments primarily selling lumber, millwork, and other building materials, such as brick and tile, cement, cinder blocks, sand and gravel, fencing materials, storm doors and windows, wallboard and roofing materials. Establishments are included in this category only if their receipts from sales of lumber and millwork are one-third or more of their total receipts.

**Building materials dealers (SIC 5212).**—Establishments primarily selling either a specialized or a general line of building materials. If lumber and millwork are sold, receipts from sales of these commodities are less than one-third of total receipts.

**Heating, plumbing equipment dealers (SIC 522).**—Establishments primarily selling plumbing supplies and heating and air conditioning equipment. Establishments primarily engaged in installation on a contract basis or in repairs are not included in the Census of Business.

**Paint, glass, wallpaper stores (SIC 523).**—Establishments primarily selling paint, glass, and wallpaper, or any combination of these lines. Establishments primarily engaged in

installing glass (except auto glass) are not included in the Census of Business.

**Electrical supply stores (SIC 524).**—Establishments primarily selling electrical supplies, such as lighting fixtures, switches, cable, and fuse boxes for use in homes. Establishments primarily selling electrical appliances are included with "Furniture, Home Furnishings, Equipment Stores" (SIC major group 57).

**Hardware stores (SIC 5251).**—Establishments primarily selling a number of basic hardware lines, such as tools, builders' hardware, paint and glass, housewares and household appliances, cutlery, and roofing materials. These establishments may also sell farm implements.

**Farm equipment dealers (SIC 5252).**—Establishments primarily selling farm tractors, reapers, mowers, plows, wagons, and related farm equipment. These establishments may also sell a combination of basic lines of hardware, such as tools, builders' hardware, housewares, cutlery and related lines.

### **General Merchandise Group (SIC Major Group 53, Except for "Nonstore Retailers")**

This group includes all establishments within SIC Major Group 53, "General Merchandise," except for "nonstore" establishments which for purposes of this publication are separately classified. The "nonstore" classification descriptions will be found immediately following those for "Other Retail Stores."

The data for establishments in this group in the 1958 Census of Business as compared with the 1954 Census of Business are affected by the treatment, in 1958, of leased departments as parts of the establishment within which they operate rather than as separate establishments. The data for department stores are most affected by this change.

**Department stores (SIC 531).**—Establishments normally employing 25 or more people and engaged in selling some items in each of the following lines of merchandise:

1. Furniture, home furnishings, appliances, radio and TV sets
2. A general line of apparel for the family
3. Household linen and dry goods

An establishment with total sales of less than \$5,000,000, in which sales of any one of these groupings is greater than 80% of total sales, is not classified as a department store.

An establishment with total sales of \$5,000,000 or more is classified as a department store even if sales of one of the groups described above is more than 80% of total sales, provided that the combined sales of the other two groups is \$500,000 or more. Relatively few stores are included in this classification as a result of this special rule and most of those which are would otherwise have been classified in the apparel group (SIC Major Group 56).

**Limited price variety stores (SIC 533).**—Establishments primarily selling a variety of merchandise in the low and popular price ranges, such as stationery, gift items, women's accessories, toilet articles, light hardware, toys, housewares, confectionery. These establishments frequently are known as "5 and 10 cent" stores and "5 cents to a dollar" stores, although merchandise is usually sold outside these price ranges.

Classification of all stores in this category is primarily based on self-designation by the store operators. The self-designation was supplemented by the addition to the 1958 Census report form of a question on food sales, the answers to which resulted in removing from this category a signifi-

cant number of smaller establishments included under this heading in the 1954 tabulations.

**General merchandise stores (Part of SIC 5392).**—Establishments primarily selling household linens and dry goods, and either apparel and accessories or furniture and home furnishings. Establishments which meet the criteria for department stores, except as to employment, are included in this classification. Included in this classification are establishments whose sales of "apparel" or of "furniture and home furnishings" exceed half of their total sales providing that sales of the smaller of the two lines in combination with "dry goods and household linens" accounts for 20% or more of total sales.

**Dry goods stores (Part of SIC 5392).**—Establishments primarily selling dry goods, notions, and piece goods.

**Sewing, needlework stores (Part of SIC 5392).**—Establishments primarily selling sewing and knitting supplies and yarn or any combination of these commodities.

**General stores (SIC 5393).**—Establishments primarily selling a general line of merchandise of which the most important line is food, and the more important subsidiary lines are notions, apparel, farm supplies, and gasoline. These establishments are usually located in rural communities. In these establishments sales of food account for at least one-third and not more than two-thirds of total sales. Establishments describing themselves as "general stores" whose sales of food exceeded two-thirds of their total sales are classified as grocery stores (SIC 5411).

### **Food Stores (SIC Major Group 54)**

Establishments primarily selling food for home preparation and consumption. Establishments primarily selling prepared food and drinks for consumption on their own premises are classified as "Eating and Drinking Places" (SIC major group 58), and stores primarily engaged in selling packaged beers and liquors are classified separately as "liquor stores."

The data for stores in this group as compared with the 1954 data may be affected by changes in the census report forms between the two years. In 1954, the classification was based on self-designation. In 1958, classification was based on the respondent identification of the commodity group accounting for the major part of total sales.

The data for "meat markets" in the 1958 Census of Business as compared with the 1954 Census of Business is affected by the treatment of leased departments as parts of the establishment within which they operate rather than as separate establishments. The same is true of "fish (seafood) markets" and "fruit stores, vegetable markets." In each of these classifications the data tend to be reduced because of this treatment.

**Grocery stores, including delicatessens (SIC 541).**—Establishments primarily selling (1) a wide variety of canned or frozen foods, such as vegetables, fruits, and soups, (2) dry groceries, either packaged or in bulk, such as tea, coffee, cocoa, dried fruits, spices, sugar, flour, and crackers, and (3) other processed food and nonedible grocery items. In addition these establishments often sell smoked and prepared meats, and fresh fish and poultry, fresh vegetables and fruits, and fresh or frozen meats. This classification includes stores which in the 1954 Census of Business were shown separately under the title "delicatessen stores."

**Meat markets (SIC 5422).**—Establishments primarily selling meat. These establishments frequently sell poultry, fish, dairy products, eggs, and some groceries.

**Fish (seafood) markets (SIC 5423).**—Establishments primarily selling fish, oysters and other shellfish, and other

seafoods. These establishments frequently sell other food items commonly used in preparing seafood or consumed with seafoods.

**Fruit stores, vegetable markets (SIC 543).**—Establishments primarily selling fresh fruits and fresh vegetables. They are frequently found in public or municipal markets. These establishments frequently carry a limited line of grocery items. Stands operated by farmers selling only their own produce are not included in the Census of Business.

**Candy, nut, confectionery stores (SIC 544).**—Establishments primarily selling candy, nuts, sweetmeats, or other confections. Operation of a soda fountain or lunch counter is common.

**Dairy products stores (SIC 545).**—Establishments primarily selling dairy products such as fluid milk and cream, cheese, ice cream, and sherbets. A limited line of groceries is frequently carried. Establishments which bottle, pasteurize, homogenize, or otherwise process fluid milk are not included in the Census of Business, but are included in the Census of Manufactures (SIC 202).

**Retail bakeries, manufacturing (SIC 5462).**—Establishments primarily selling bakery products, such as bread, cakes, pies, or cookies, over the counter, some or all of which is baked on their own premises. Bakeries, most of whose products are distributed directly to consumers by means of route delivery, are not included in the Census of Business but are included in the Census of Manufactures (SIC 205).

**Retail bakeries, nonmanufacturing (SIC 5463).**—Establishments primarily selling bakery products, such as bread, cakes, pies, or cookies, over the counter. Establishments included in this category do not bake any of the products they sell.

**Egg and poultry dealers (SIC 5491).**—Establishments primarily selling eggs and poultry. A limited line of groceries is frequently carried.

**Other (SIC 5499).**—Establishments, not elsewhere classified, primarily selling specialized lines of food such as coffee and tea stores, spice shops, health food stores, etc.

### **Automotive Dealers (SIC Major Group 55, Except 554)**

**NOTE:** This group does not include establishments primarily engaged in selling trucks and motorized industrial equipment. Such establishments are included in the Wholesale Trade portion of the Census of Business.

**Passenger car dealers, franchised (SIC 551).**—Establishments primarily selling new automobiles, or new and used automobiles and trucks. These establishments frequently operate repair shops and used car lots and may carry stocks of replacement parts, tires, batteries, and automotive accessories. In some tabulations this category is subdivided to show data separately for establishments which sell (1) new domestically produced passenger cars only, (2) new imported passenger cars only, and (3) new domestic and imported passenger cars. Used car lots and repair shops operated by franchised dealers are not recognized as separate establishments. Data for such operations are consolidated in this category with other data for franchised passenger car dealers.

**Passenger car dealers, nonfranchised (SIC 552).**—Establishments primarily selling used cars and trucks and not holding a franchise for the sale of new passenger cars.

**Tire, battery, accessory dealers (SIC 553).**—Establishments primarily selling new automobile tires, batteries,

Not included in this group are the establishments which meet the criteria for department stores or general merchandise stores (SIC 531 and part of 5392), even though most of their receipts are from the sale of apparel and apparel accessories.

3 or more times the sales of all men's and boys' apparel, and (3) sales of women's and girls' coats, suits, and dresses are at least one-third of sales of all women's and girls' apparel. Establishments primarily selling garments made to customer order are classified as custom tailors (SIC 567).

## Nonstore Retailers (Part of SIC Major Group 53)

Mail-order houses (SIC 532).—Establishments primarily engaged in distributing merchandise through the mail as a result of mail orders received. Each establishment of organizations which operate both mail-order houses and other retail establishments is classified on the basis of its own operations. Consequently, the mail-order houses of such organizations are included in this classification while their other establishments are included in whichever of the above kind-of-business classifications is appropriate to their operation. Mail-order houses are divided into subclassifications on the basis of the merchandise they sell in the same manner as the store-type classifications.

Merchandise vending machine operators (SIC 534).—Establishments primarily engaged in the sale of merchandise through coin-operated vending machines which generally are located on the premises of other businesses. Since a large number of merchandise vending machine operations are conducted in conjunction with the operations of manufacturing plants, and of wholesale and other establishments not classified in Retail Trade, data for "retail" merchandise vending machine operators should not be interpreted as providing a measure of total sales through merchandise vending machines. The data for "retail" merchandise vending machine operators also do not include sales made through vending machines owned by establishments classified in other kinds of retail trade. Merchandise vending machine operators are divided into subclassifications on the basis of the merchandise sold in the machines on location as of the end of the census year.

Direct selling (house to house) organizations (SIC 535).—Establishments which solicit orders and distribute their products by house-to-house canvass. When the canvassers are employed by the organization which they represent, the "establishment" is the location from which they operate. However, many of the important organizations whose products are distributed in this manner utilize self-employed canvassers as their representatives. Each such canvasser is counted as an "establishment" in this report. As a result, the "number of establishments" data is considerably larger than would be the case if the count were based on the primary organizations whose products are being distributed. Since only establishments having sales of \$2,500 or more during the census year are included, the "number of establishments" in this category should not be interpreted as being a count of the total number of self-employed canvassers. Direct selling (house to house) organizations are divided into subclassifications on the basis of the merchandise they sell in the same manner as the store-type classification.

## RETAIL TRADE—AREA STATISTICS

The establishments covered in the table which follows are those operated by the Department of Defense on military installations of the Departments of the Army, Navy, Air Forces, and the Marine Corps in the conterminous United States for the use of military personnel and their dependents.

The establishments are of three types:

1. Commissaries—handling mostly food and grocery items for off-premises consumption.

2. Exchanges—known as "PX's" or "Ships Stores", dispensing a large variety of consumer goods other than food.

3. Eating and drinking places—not including mess halls or other facilities operated by the military establishments for the serving of regular, daily meals to military personnel.

They are manned, for the most part, by civilian personnel but these are supplemented in some cases by military help. However, the employment and payroll data in this table are for civilian employment only.

Table 12.—COMMISSARIES, EXCHANGES, AND EATING AND DRINKING PLACES OPERATED FOR MILITARY PERSONNEL BY THE U. S. DEPARTMENT OF DEFENSE: 1958
